Give your Halloween a Re- Purpose

FIND YOUR REPURPOSE

Why buy new Halloween decorations when you can make your own from things you already have? Here's how.

Halloween tins

You'll need:

Some used tins, scissors, paints or paint pens, old white material or bandages, something for eyes and a plastic spider (optional).

1. Clean your tins and remove all packaging.

2. Now for the spooky colours! Paint your tins orange for pumpkins, black for cats or wrap them in old white material to make mummies.

3. Time to get creative! Add googly eyes, draw funny or frightening faces and give your Halloween characters some personality.
This is the part the kids will love!

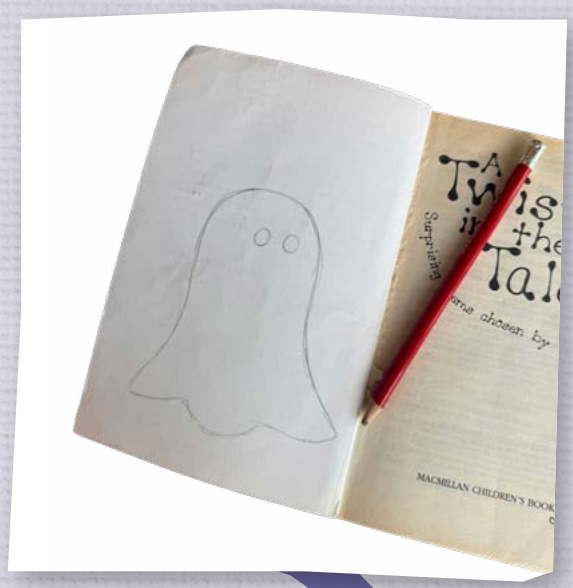

Ghost bunting

You'll need:

An old book or newspaper, scissors, a pen and pencil, a needle and thread.

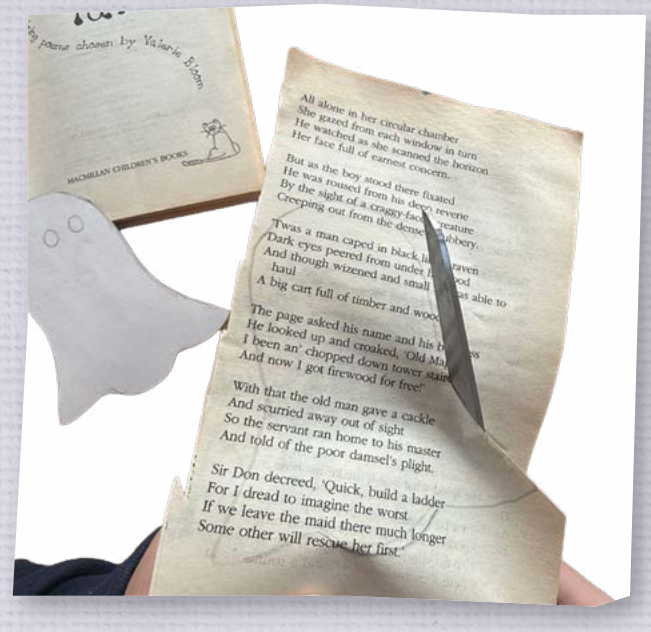

1. Draw a simple ghost shape on a piece of paper and cut it out to make your template.

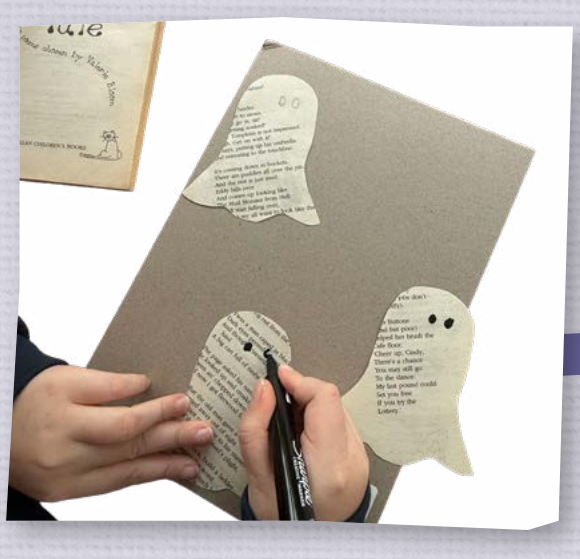

2. Grab an old book or newspaper and draw around your template to create lots of little ghosts.

3. Carefully cut out your ghosts, ready to bring them to life!

4. Time to give your ghosts some personality! Draw on spooky or silly faces.

5. Use scissors or a needle to create two holes at the top of your ghosts.

6. Thread your ghosts together to create your very own spooky bunting!

And ta-da.

Your ghosts are ready to display.
